INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 94 (1989)

SUBJECT INDEX

(SF_5^+)
a high pressure mass spectrometric study of the formation and chemistry of the pentafluorosulphur cation —, 269
ab initio molecular orbital calculations
a study of the aminomethyl radical CH_2NH_2 by vacuum UV photoelectron spectroscopy and —, 221
acetonitrile–water system
energy-resolved collision-induced dissociation of proton-bound cluster ions as a structural probe: the —, 41
alkali halide molecules
main factors decisive of the threshold temperature range causing a sharp change in thermal positive ionization efficiency of — incident upon a rhenium surface, 179
aminomethyl radical
a study of the — CH_2NH_2 by vacuum UV photoelectron spectroscopy and ab initio molecular orbital calculations, 221
anomalous ion transmission
— in a laser microprobe (LAMMS): investigation by high frequency monitoring of the current through the sample/target, 237
azulene
thermal electron detachment rate constants for — at atmospheric pressure by the photodetachment-modulated electron capture detector, 293

barium titanate system
heteropolyatomic ions in a spark source: the —, 261

C_2 hydrocarbon ions
reactions of — and C_3 hydrocarbon ions with H, D, H_2 and D_2 at near-thermal energies, 251
C_3 hydrocarbon ions
reactions of C_2 and — with H, D, H_2 and D_2 at near-thermal energies, 251
carbon dioxide
a two-state treatment of the electron transfer reactions from — to helium ions, 87
carbon target
mass distributions of ions sputtered by cluster impacts on carbon, copper and gold targets, 25
CH_2NH_2
a study of the aminomethyl radical — by vacuum UV photoelectron spectroscopy and ab initio molecular orbital calculations, 221
chemical ionization
mass-selection of reactant ions for — in quadrupole ion trap and triple quadrupole mass spectrometers, 115
cluster impacts
mass distributions of ions sputtered by — on carbon, copper and gold targets, 25
collisional neutralization–reionization processes
translational energy spectroscopy of —, 189
copper target
mass distributions of ions sputtered by cluster impacts on carbon, copper and gold targets, 25

D
reactions of C_2 and C_3 hydrocarbon ions with H, —, H_2 and D_2 at near-thermal energies, 251
D_2
reactions of C_2 and C_3 hydrocarbon ions with H, D, H_2 and — at near thermal energies, 251

electron transfer
a two-state treatment of the — reactions from carbon dioxide to helium ions, 87
ethane
thermochemistry of Ti^+–hydrocarbon bonds: translational energy dependence of the reactions of Ti^+ with —, propane, and *trans*-2-butene, 149

gaseous ion chemistry
studies in — using a hybrid BEQQ mass spectrometer, 321
gold target
mass distributions of ions sputtered by clus-

ter impacts on carbon, copper and gold targets, 25

H
reactions of C_2 and C_3 hydrocarbon ions with —, D, H_2 and D_2 at near-thermal energies, 251
H_2
reactions of C_2 and C_3 hydrocarbon ions with H, D, — and D_2 at near-thermal energies, 251
helium ions
a two-state treatment of the electron transfer reactions from carbon dioxide to —, 87
heteropolyatomic ions
— in a spark source: the barium titanate system, 261
high pressure MS
a high pressure mass spectrometric study of the formation and chemistry of the pentafluorosulphur cation (SF_5^+), 269
high-precision isotopic measurement
— of lithium by thermal ionization mass spectrometry, 101
hybrid BEQQ MS
studies in gaseous ion chemistry using a —, 321
hydrodynamic modelling
— of laser plasma ionization processes, 63

ion/surface collisions
— phenomena in an improved tandem time-of-flight instrument, 1

laser desorption MS
— and MS/MS with a three dimensional quadrupole ion trap, 15
laser desorption MS/MS
laser desorption mass spectrometry and — with a three dimensional quadrupole ion trap, 15
laser microprobe
anomalous ion transmission in a — (LAMMS): investigation by high frequency monitoring of the current through the sample/target, 237
laser plasma ionization
hydrodynamic modelling of — processes, 63
lithium
high-precision isotopic measurement of — by thermal ionization mass spectrometry, 101

mass distributions
— of ions sputtered by cluster impacts on carbon, copper and gold targets, 25
mass-selection
— of reactant ions for chemical ionization in quadrupole ion trap and triple quadrupole mass spectrometers, 115

near-thermal energies
reactions of C_2 and C_3 hydrocarbon ions with H, D, H_2 and D_2 at —, 251

PDM-ECD
thermal electron detachment rate constants for azulene$^-$ at atmospheric pressure by the —, 293
pentafluorosulphur cation
a high pressure mass spectrometric study of the formation and chemistry of the — (SF_5^+), 269
propane
thermochemistry of Ti^+–hydrocarbon bonds: translational energy dependence of the reactions of Ti^+ with ethane, —, and *trans*-2-butene, 149
proton-bound cluster ions
energy-resolved collision-induced dissociation of — as a structural probe: the acetonitrile–water system, 41

quadrupole ion trap MS
mass-selection of reactant ions for chemical ionization in quadrupole ion trap and quadrupole mass spectrometers, 115

rhenium surface
main factors decisive of the threshold temperature range causing a sharp change in thermal positive ionization efficiency of alkali halide molecules incident upon a —, 179

second-order space-time transfer matrix
— of the two-stage electrostatic mirror, 281
spontaneous desorption
experimental investigations of —, 205
spontaneous desorption MS
mass spectra of organic and inorganic samples obtained using —, 305

tandem TOF MS
ion/surface collision phenomena in an improved tandem time-of flight instrument, 1
thermal electron detachment
— rate constants for azulene at atmospheric pressure by the photodetachment-modulated electron capture detector, 293

thermal ionization MS
high-precision isotopic measurement of lithium by —, 101
thermal positive ionization efficiency
main factors decisive of the threshold temperature range causing a sharp change in — of alkali halide molecules incident upon a rhenium surface, 179
three dimensional quadrupole ion trap
laser desorption mass spectrometry and MS/MS with a —, 15
threshold temperature range
main factors decisive of the — causing a sharp change in thermal positive ionization efficiency of alkali halide molecules incident upon a rhenium surface, 179
Ti^+
thermochemistry of Ti^+–hydrocarbon bonds: translational energy dependence of the reactions of — with ethane, propane, and *trans*-2-butene, 149
Ti^+–hydrocarbon bonds
thermochemistry of —: translational energy dependence of the reactions of Ti^+ with ethane, propane, and *trans*-2-butene, 149
trans-2-butene
thermochemistry of Ti^+–hydrocarbon bonds: translational energy dependence of the reactions of Ti^+ with ethane, propane, and —, 149
translational energy spectroscopy
— of collisional neutralization–reionization processes, 189
triple quadrupole MS
mass-selection of reactant ions for chemical ionization in quadrupole ion trap and triple quadrupole mass spectrometers, 115
two-stage electrostatic mirror
second-order space-time transfer matrix of the —, 281
two-state treatment
a — of the electron transfer reactions from carbon dioxide to helium ions, 87

vacuum UV photoelectron spectroscopy
a study of the aminomethyl radical CH_2NH_2 by — and ab initio molecular orbital calculations, 221
